Complementary measures would be initiated independently of an association of Switzerland to strengthen Research and Innovation through complementary actions.

Replacement measures shall only be initiated if no association to the EU Framework Programme for Research and Innovation is possible in the long run.

Complementary measures will be examined.

Transitional measures take effect immediately to remedy inaccessible calls and funding. Transitional measures have been initiated for the 2021 and 2022 calls for proposals (Decision of the Federal Council in September 2021). Further transitional measures for the year 2022 are in preparation.
